HIGHLIGHTS

- Backend-leaning builder experienced in **distributed application design**, data modeling, and systems that balance correctness, speed, and maintainability in startup and research environments.

EDUCATION

University of Waterloo | *CGPA: 92.3/100* *Sep 2024 - Apr 2029*
Bachelor of Computer Science, Honours Computer Science, AI Specialization

EXPERIENCE

Software Developer Intern | *Richmond, BC* *Sep 2025 - Apr 2026*
Ziyutec Inc.

- Owned the end-to-end planning, development, and deployment of a global B2B marketplace on AWS, leading system design and implementation across the full SDLC.
- Architected a Role-Based Access Control framework with NestJS and PostgreSQL, balancing database normalization, query performance, and data integrity checks.
- Maintained and enhanced a multi-tenant ERP platform with 60K+ lines of legacy code supporting 1,000+ active projects, and resolved a long-standing session management defect by implementing JWT refresh token rotation.

PROJECTS

Marketplace Platform | *NestJS, PostgreSQL, AWS*

- Led architecture and implementation of a production marketplace product from blank repo to deployment.
- Designed backend workflows that balanced product speed with transactional correctness.

SKILLS

Programming Languages: `built-in method items of dict object at 0x10ea40b00`

AI and ML: `built-in method items of dict object at 0x10ea410c0`

Frameworks: `built-in method items of dict object at 0x10ea16c40`

Platforms: `built-in method items of dict object at 0x10e8f5300`

PROFESSIONAL CERTIFICATES

Stanford Online *December 2025*
XCS224N Natural Language Understanding [credential](#)
